About Me

I am a recent graduate with a Bachelor's degree in Applied Mathematics from Can Tho University. My academic background has provided me with a solid foundation in mathematics, statistics, and analytical thinking.

I have hands-on experience in data analysis using Python, SQL, R, Excel, and Power BI through academic projects and professional training. I enjoy transforming raw data into meaningful insights that support business decision-making. As an aspiring Data Analyst, I am eager to continuously learn, solve real-world business problems, and contribute to data-driven organizations.

Education

Can Tho University	2021 – 2025
Bachelor of Applied Mathematics	
GPA: 3.18/4.0	
Graduation Thesis	
Some Properties of the Clarke Subdifferential	
Thesis Score: 9.8/10	

Academic Projects / Relevant Experience

Statistical Data Analysis with R	2023 – 2025
Applied Mathematics Major – Can Tho University	
• Applied R programming language to analyze data in related courses, including Advanced Statistics, Time Series Analysis, Multivariate Statistics, Forecasting Statistics, and Applied Statistics. • Performed data processing and statistical analysis, including distribution analysis, hypothesis testing, and model building. • Visualized data and presented analytical results.	

Project	2025
Intelligent Data Analysis Course – CUSC Aptech	
- Project "Forecasting Drug Group Sales at a Pharmacy Outlet" (https://github.com/lttvan1722/Project)	
• Tested and evaluated the effectiveness of machine learning methods, including K-means, Decision Tree, and Apriori Algorithm, in analyzing and forecasting business results.	
- My Contribution (From page 38)	
• Conducted research using the Apriori Algorithm to mine association rules and identify effective product baskets at the pharmacy. • Analyzed consumption relationships among drug groups and examined monthly and quarterly revenue trends to identify patterns that support prescription decisions and inventory management.	

Work Experience	Summer 2021 – 2026
Sales Staff – Pearl Jewelry, Phu Quoc	

- Consulted customers based on their needs.
- Handled customer situations and improved customer experience.
- Worked under sales pressure with flexibility and adaptability.

Skills

Technical Skills: R, SQL, MongoDB, Microsoft Excel (Advanced), Matlab, Power BI, Python.

Soft Skills:

- Research and analytical thinking
- Strong sense of responsibility and proactive learning
- Basic English communication and technical reading skills
- Proficient in Microsoft Office (Word, Excel, PowerPoint)

Certifications

- Intelligent Data Analytics (ACN Pro) – CUSC Aptech (October 2025)
- VSTEP B1 English Certificate – Can Tho University (January 2025)
- Basic Accounting Certificate – Can Tho University (April 2026)

Extracurricular Activities

Executive Committee Member

2024 - 2025

Applied Mathematics Youth Union, Course K47

- Assisted in organizing academic and student engagement activities.
- Collaborated with committee members to support student events and initiatives.

Volunteer Member

2021 - 2025

Cai Rang Student Association, Can Tho University

- Participated in volunteer programs and community service activities.
- Supported student association events and social initiatives.
